

## Safety Data Sheet

According to New Zealand, Hazardous Substances and New Organisms Act 1996 (HSNO Act) and Regulations, as amended.

**Initial preparation date:** 22.05.2019

Page **1** of **13**

**Revision date:** 22.07.2024

### FEN-IVERQUANTEL

#### SECTION 1: Identification

##### Product identifier

**Product name:** FEN-IVERQUANTEL

**Synonyms:** IVERMECTIN, PRAZIQUANTEL AND FENBENDAZOLE

##### Recommended use of the product and restriction on use:

**Relevant identified uses:** VETERINARY USE: Endoparasiticide for use in horses.

**Uses advised against:** Not for human use.

**Reasons why uses advised against:** Veterinary product.

##### Manufacturer or supplier details

###### Supplier:

**Dechra Veterinary Products NZ Limited**

PO Box 1604,

Paraparaumu Beach, 5252

New Zealand

Phone: 0800 479 838

Email: [info.nz@dechra.com](mailto:info.nz@dechra.com)

Website: <http://www.dechra.co.nz/>

##### Emergency telephone number:

###### New Zealand

National Poisons Centre

0800 764 766

#### SECTION 2: Hazards identification

**Not Classified as a Dangerous Good according to NZS 5433:2012 Transport of Dangerous Goods on Land.**

**Classified in accordance with the Hazardous Substances (Hazard Classification) Notice 2020**

**HSNO Classification or Subclasses – Physical hazards:** Not applicable

**HSNO Classification or Subclasses – Health hazards:**

| Class                 | GHS Category | HSNO Category |
|-----------------------|--------------|---------------|
| Acute toxicity (oral) | Category 4   | 6.1D (oral)   |
| Eye irritation        | Category 2A  | 6.4A          |
| Reproductive toxicity | Category 2   | 6.8B          |

# Safety Data Sheet

According to New Zealand, Hazardous Substances and New Organisms Act 1996 (HSNO Act) and Regulations, as amended.

Initial preparation date: 22.05.2019

Page 2 of 13

Revision date: 22.07.2024

## FEN-IVERQUANTEL

**HSNO Classification or Subclasses – Environmental hazards:** Not applicable

**GHS classification:**

Acute toxicity (oral), category 4  
Eye irritation, category 2A  
Reproductive toxicity, category 2

**Label elements**

**Hazard pictogram(s):**

**Signal word:** Warning

**Hazard statements:**

H319 Causes serious eye irritation  
H361 Suspected of damaging fertility or the unborn child  
H302 Harmful if swallowed

**Precautionary statements:**

P280 Wear protective gloves, protective clothing and eye protection  
P201 Obtain special instructions before use  
P202 Do not handle until all safety precautions have been read and understood  
P264 Wash any exposed skin thoroughly for 15 minutes after handling  
P270 Do not eat, drink or smoke when using this product  
P308+P313 If exposed or concerned: Get medical advice and attention  
P301+P312 IF SWALLOWED: Call a POISON CENTER or doctor if you feel unwell  
P330 Rinse mouth  
P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing  
P337+P313 If eye irritation persists: Get medical advice and attention  
P405 Store locked up  
P501 Dispose of contents and container in accordance with local regulations

**Hazards not otherwise classified:**

None.

## SECTION 3: Composition/information on ingredients

**Mixture:**

| Identification            | Name                 | Weight % |
|---------------------------|----------------------|----------|
| CAS number:<br>43210-67-9 | Fenbendazole         | 20.5     |
| CAS number:<br>57-55-6    | Monopropylene glycol | 10-20    |
| CAS number:<br>55268-74-1 | Praziquantel         | 5.125    |

# Safety Data Sheet

According to New Zealand, Hazardous Substances and New Organisms Act 1996 (HSNO Act) and Regulations, as amended.

Initial preparation date: 22.05.2019

Page 3 of 13

Revision date: 22.07.2024

## FEN-IVERQUANTEL

|                           |                  |      |
|---------------------------|------------------|------|
| CAS number:<br>102-71-6   | Triethanolamine  | 1-5  |
| CAS number:<br>9003-01-4  | Polyacrylic acid | 1-5  |
| CAS number:<br>70288-86-7 | Ivermectin       | 0.42 |
| CAS number:<br>8007-70-3  | Anise seed oil   | <1   |

### Additional information:

The specific chemical identity and/or exact percentage (concentration) of composition has been withheld as a trade secret under the provisions of sections 55 (7) of the HSNO Act.

## SECTION 4: First-aid measures

**For advice, contact a Poisons Information Center (e.g. phone Australia 131 126, New Zealand 0800 764 766) or a doctor.**

### Description of first aid measures

#### General notes:

Show this Safety Data Sheet to the doctor in attendance. Take precautions to ensure your own safety before attempting rescue. Wear appropriate safety eyewear, gloves, protective clothing and respiratory protection to prevent exposure. See Section 8 of this SDS for personal protective equipment recommendations. Do not use the mouth to mouth method if victim has ingested or inhaled the product. Give artificial respiration with the aid of a pocket mask equipped with a one-way valve or other proper device.

#### After inhalation:

If inhaled, remove person to fresh air and place in a position comfortable for breathing. Keep person at rest. If breathing is difficult, administer oxygen. If breathing has stopped, provide artificial respiration. If symptoms develop or persist, seek medical advice/attention.

#### After skin contact:

Remove contaminated clothing and shoes. Rinse skin with copious amounts of water [shower] for several minutes. Launder contaminated clothing before reuse. If symptoms develop or persist, seek medical advice/attention.

#### After eye contact:

Rinse eyes with plenty of gently flowing lukewarm water for 15 minutes. Remove contact lenses if present and easy to do so. Protect unexposed eye. If symptoms develop or persist, seek medical advice/attention.

#### After swallowing:

If swallowed, DO NOT induce vomiting unless told to do so by a physician or poison control center. Rinse mouth with water. Never give anything by mouth to an unconscious person. If spontaneous vomiting occurs, place on the left side with head down to prevent aspiration of liquid into the lungs. If symptoms develop or persist, seek medical advice/attention.

### Most important symptoms and effects, both acute and delayed:

#### Acute symptoms and effects:

Eye contact may result in irritation, redness, pain, inflammation, itching, burning and tearing. Acute oral exposure may lead to dizziness, drowsiness, headache, breathing difficulties, nausea, vomiting, abdominal pain, and lowering of consciousness. Adverse effects are dependent on exposure (dose, concentration, contact time).

# Safety Data Sheet

According to New Zealand, Hazardous Substances and New Organisms Act 1996 (HSNO Act) and Regulations, as amended.

Initial preparation date: 22.05.2019

Page 4 of 13

Revision date: 22.07.2024

## FEN-IVERQUANTEL

### Delayed symptoms and effects:

Effects are dependent on exposure (dose, concentration, contact time).

Long term exposure may affect fertility. Symptoms include, but are not limited to: menstrual problems, altered sexual behavior/fertility/ and pregnancy outcome. Long term exposure may also affect development of the unborn child. Symptoms include, but are not limited to: intrauterine growth retardation, pre-term birth, birth defects and postnatal death.

Symptoms of exposure may be delayed.

### Immediate medical attention and special treatment:

#### Specific treatment:

Not determined or not applicable.

#### Notes for the doctor:

Treat symptomatically.

#### Workplace Facilities:

No additional information.

## SECTION 5: Fire-fighting measures

### Extinguishing media

#### Suitable extinguishing media:

Use an extinguishing agent suitable for the surrounding fire.

#### Unsuitable extinguishing media:

Do not use water jet.

### Specific hazards during fire-fighting:

May evolve carbon oxides and hydrocarbons when heated to decomposition.

### Special protective equipment for firefighters:

Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full-face piece operated in positive pressure mode.

### Special precautions:

Avoid contact with skin, eyes, hair and clothing. Do not breathe fumes/gas/mists/aerosols/vapors/dusts.

Move containers from fire area if safe to do so. Use water spray/fog for cooling fire exposed containers.

Avoid unnecessary run-off of extinguishing media which may cause pollution.

### Hazchem or Emergency Action Code:

Not Applicable.

## SECTION 6: Accidental release measures

### Personal precautions, protective equipment and emergency procedures:

Wear recommended personal protective equipment (see Section 8). Avoid contact with skin, eyes and clothing.

Avoid breathing mist, vapor, dust, fume and spray. Do not walk through spilled material. Wash thoroughly after handling.

### Environmental precautions:

Prevent further leakage or spillage if safe to do so. Prevent from reaching drains, sewers and waterways.

Discharge into the environment must be avoided.

# Safety Data Sheet

According to New Zealand, Hazardous Substances and New Organisms Act 1996 (HSNO Act) and Regulations, as amended.

Initial preparation date: 22.05.2019

Page 5 of 13

Revision date: 22.07.2024

## FEN-IVERQUANTEL

### Methods and material for containment and cleaning up:

Harmful if swallowed. Do not touch damaged containers or spilled material unless wearing appropriate personal protective clothing. Stop leak if you can do it without risk. Contain spillage, then cover / absorb spill with non-combustible absorbent material (vermiculite, sand, or similar), collect and place in suitable containers for disposal. Dispose of in accordance with all applicable regulations (see Section 13).

### Reference to other sections:

For personal protective equipment see Section 8. For disposal see Section 13.

## SECTION 7: Handling and storage precautions

### Precautions for safe handling:

Carefully read the product label before use. Use appropriate personal protective equipment (see Section 8). Use only with adequate ventilation. Avoid breathing mist/vapor/spray/dust. Do not eat, drink, smoke, or use personal products when handling chemical substances. Avoid contact with skin, eyes and clothing. Wash affected areas thoroughly after handling. Keep away from incompatible materials (See Section 10). Keep containers tightly closed when not in use.

### Conditions for safe storage, including any incompatibilities:

Keep out of reach of children. Store below 25°C (room temperature), in cool, dry, well-ventilated location out of direct sunlight in an HDPE container. Keep away from food and beverages. Storage areas and containers should be clearly marked for drug holding. Protect from freezing and physical damage. Store away from heat, open flames and other sources of ignition. Keep container tightly sealed. Store away from incompatible materials (See Section 10).

### Safe packaging material

#### Suitable material:

Not determined or not applicable.

#### Unsuitable material:

Not determined or not applicable.

## SECTION 8: Exposure controls and personal protection

### Occupational Exposure limit values:

| Country<br>(Legal Basis) | Substance            | Identifier | Permissible concentration   |
|--------------------------|----------------------|------------|---|
| New Zealand              | Monopropylene glycol | 57-55-6    | 8-hour TWA: 10 mg/m <sup>3</sup><br>[particulates only]               |
|                          | Monopropylene glycol | 57-55-6    | 8-hour TWA: 150 ppm (474 mg/m <sup>3</sup> ) [particulates and vapor] |
|                          | Triethanolamine      | 102-71-6   | 8-hour TWA: 1 mg/m <sup>3</sup>                                       |

### Biological limit value:

No biological exposure limits noted for the ingredient(s).

### Information on monitoring procedures:

Not determined or not applicable

# Safety Data Sheet

According to New Zealand, Hazardous Substances and New Organisms Act 1996 (HSNO Act) and Regulations, as amended.

Initial preparation date: 22.05.2019

Page 6 of 13

Revision date: 22.07.2024

## FEN-IVERQUANTEL

### Appropriate engineering controls:

Emergency eye wash stations and safety showers should be available in the immediate vicinity of use or handling. Provide adequate ventilation to maintain the airborne concentrations of vapor, mists, and/or dusts below the applicable workplace exposure limits, while observing recognized national standards (or equivalent).

### Personal protection equipment

#### Eye and face protection:

Safety glasses or goggles. Use eye protection equipment that has been tested and approved by recognized national standards (or equivalent).

#### Skin and body protection:

Chemical resistant, impervious gloves approved by the appropriate standards. Gloves must be inspected prior to use. Avoid skin contact with used gloves. Appropriate techniques should be used to remove used gloves and contaminated clothing. Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. Ensure that all personal protective equipment is approved by recognized national standards (or equivalent).

#### Respiratory protection:

Not determined or not applicable.

### General hygienic measures:

When handling chemical products, do not eat, drink or smoke. Wash hands after handling, before breaks, and at the end of the workday. Avoid contact with skin, eyes and clothing. Wash contaminated clothing before reuse. Perform routine housekeeping.

## SECTION 9: Physical and chemical properties

|  |                                  |
|--|----------------------------------|
| <b>Physical state</b>                          | Opaque pale blue gel             |
| <b>Odour</b>                                   | Aniseed odour                    |
| <b>Odour threshold</b>                         | Not determined or not available. |
| <b>pH</b>                                      | 6.0 to 7.0                       |
| <b>Melting point/freezing point</b>            | Not determined or not available. |
| <b>Initial boiling point/range</b>             | Not determined or not available. |
| <b>Flash point (closed cup)</b>                | Not determined or not available. |
| <b>Flammability (solid, gas)</b>               | Non flammable                    |
| <b>Upper flammability/explosive limit</b>      | Not determined or not available. |
| <b>Lower flammability/explosive limit</b>      | Not determined or not available. |
| <b>Vapour pressure</b>                         | Not determined or not available. |
| <b>Vapour density</b>                          | Not determined or not available. |
| <b>Relative density</b>                        | 0.95 to 1.06                     |
| <b>Solubilities</b>                            | Not determined or not available. |
| <b>Partition coefficient (n-octanol/water)</b> | Not determined or not available. |
| <b>Auto/Self-ignition temperature</b>          | Not determined or not available. |
| <b>Decomposition temperature</b>               | Not determined or not available. |
| <b>Kinematic viscosity</b>                     | Not determined or not available. |
| <b>Particle characteristics</b>                | Not determined or not available. |

# Safety Data Sheet

According to New Zealand, Hazardous Substances and New Organisms Act 1996 (HSNO Act) and Regulations, as amended.

Initial preparation date: 22.05.2019

Page 7 of 13

Revision date: 22.07.2024

## FEN-IVERQUANTEL

**Other information:** No additional information.

### SECTION 10: Stability and reactivity

**Reactivity:**

Not reactive under recommended handling and storage conditions.

**Chemical stability:**

Stable under recommended handling and storage conditions.

**Possibility of hazardous reactions:**

Hazardous reactions are not anticipated under recommended conditions of handling and storage.

**Conditions to avoid:**

Extreme heat, open flames, hot surfaces, sparks, ignition sources and incompatible materials.

**Incompatible materials:**

Oxidising agents (e.g. hypochlorites), acids (e.g. nitric acid) and alkalis (e.g. sodium hydroxide).

**Hazardous decomposition products:**

May evolve carbon oxides and hydrocarbons when heated to decomposition.

### SECTION 11: Toxicological information

**Acute toxicity**

**Assessment:**

Harmful if swallowed.

**Product data:**

| Route    | Result                  |
|----------|-------------------------|
| Oral ATE | LD50 Rat: 1135.58 mg/kg |

**Substance data:**

| Name                 | Route      | Result                                  |
|----------------------|------------|---|
| Ivermectin           | Oral ATE   | LD50 Rat: 5 mg/kg                       |
|                      | Dermal ATE | LD50 Rabbit: 300 mg/kg                  |
| Monopropylene glycol | oral       | LD50 Rat: 22,000 mg/kg                  |
|                      | dermal     | LD50 Rabbit: >2000 mg/kg                |
|                      | inhalation | LC50 Rabbit: > 44.9 mg/L (4hr [vapour]) |
| Polyacrylic acid     | oral       | LD50 Rat: 1500 mg/kg                    |
|                      | dermal     | LD50 Rabbit: >2000 mg/kg                |
|                      | inhalation | LC50 Rat: >5.1 mg/L (4h [Vapor])        |
| Triethanolamine      | oral       | LD50 Rat: 6400 mg/kg                    |
|                      | dermal     | LD50 Rabbit: >2000 mg/kg                |
| Fenbendazole         | oral       | LD50 Rat: > 10,000 mg/kg                |

**Skin corrosion/irritation**

**Assessment:** Based on available data, the classification criteria are not met.

**Product data:** No data available.

**Substance data:**

| Name             | Result                  |
|------------------|-------------------------|
| Polyacrylic acid | Causes skin irritation. |
| Triethanolamine  | Causes skin irritation. |

# Safety Data Sheet

According to New Zealand, Hazardous Substances and New Organisms Act 1996 (HSNO Act) and Regulations, as amended.

Initial preparation date: 22.05.2019

Page 8 of 13

Revision date: 22.07.2024

## FEN-IVERQUANTEL

### Serious eye damage/irritation

#### Assessment:

Causes serious eye irritation.

**Product data:** No data available.

#### Substance data:

| Name             | Result                         |
|------------------|--------------------------------|
| Polyacrylic acid | Causes serious eye damage.     |
| Triethanolamine  | Causes serious eye irritation. |

### Respiratory or skin sensitization:

**Assessment:** Based on available data, the classification criteria are not met.

**Product data:** No data available.

#### Substance data:

| Name           | Result                               |
|----------------|--------------------------------------|
| Anise seed oil | May cause an allergic skin reaction. |

### Carcinogenicity

**Assessment:** Based on available data, the classification criteria are not met.

**Product data:** No data available.

#### Substance data:

| Name           | Species | Result                       |
|----------------|---------|------------------------------|
| Anise seed oil |         | Suspected of causing cancer. |

### International Agency for Research on Cancer (IARC):

| Name       | Classification |
|------------|----------------|
| Ivermectin | Group 2A       |

### Germ cell mutagenicity

**Assessment:** Based on available data, the classification criteria are not met.

**Product data:** No data available.

#### Substance data:

| Name           | Result                                |
|----------------|---------------------------------------|
| Anise seed oil | Suspected of causing genetic defects. |

### Reproductive toxicity

#### Assessment:

Suspected of damaging fertility or the unborn child.

**Product data:** No data available.

#### Substance data:

| Name         | Result   |
|--------------|--|
| Fenbendazole | Suspected of damaging fertility or the unborn child. |

# Safety Data Sheet

According to New Zealand, Hazardous Substances and New Organisms Act 1996 (HSNO Act) and Regulations, as amended.

Initial preparation date: 22.05.2019

Page 9 of 13

Revision date: 22.07.2024

## FEN-IVERQUANTEL

### Specific target organ toxicity (single exposure)

**Assessment:** Based on available data, the classification criteria are not met.

**Product data:** No data available.

#### Substance data:

| Name             | Result                            |
|------------------|-----------------------------------|
| Polyacrylic acid | May cause respiratory irritation. |
| Triethanolamine  | May cause respiratory irritation. |

### Specific target organ toxicity (repeated exposure)

**Assessment:** Based on available data, the classification criteria are not met.

**Product data:** No data available.

**Substance data:** No data available.

### Aspiration toxicity

**Assessment:** Based on available data, the classification criteria are not met.

**Product data:** No data available.

**Substance data:** No data available.

### Information on likely routes of exposure:

Ingestion, skin and eye contact.

### Symptoms related to the physical, chemical and toxicological characteristics:

See section 4 of this SDS.

### Other information:

No data available.

## SECTION 12: Ecological information

### Acute (short-term) toxicity

#### Assessment:

Toxic to aquatic life.

**Product data:** No data available.

#### Substance data:

| Name                 | Result  |
|----------------------|---|
| Monopropylene glycol | Fish LC50 Oncorhynchus mykiss: 51,600 mg/L (96 hr)  |
|                      | Aquatic Plants EC50 Raphidocelis subcapitata: 19000 mg/L (96 hr [growth rate])                    |
|                      | Aquatic Invertebrates EC50 Daphnia magna: 43,500 mg/L (48 hr [Immobilisation])                    |
| Polyacrylic acid     | Fish LC50 Oncorhynchus mykiss: 27 mg/L (96 hr [read-across])                                      |
|                      | Aquatic Invertebrates EC50 Daphnia magna: 47 - 95 mg/L (48 hr [mobility; read-across])            |
|                      | Aquatic Plants EC50 Pseudokirchneriella subcapitata: 0.75 mg/L (72 hr [growth rate; read-across]) |

# Safety Data Sheet

According to New Zealand, Hazardous Substances and New Organisms Act 1996 (HSNO Act) and Regulations, as amended.

Initial preparation date: 22.05.2019

Page 10 of 13

Revision date: 22.07.2024

## FEN-IVERQUANTEL

| Name            | Result   |
|-----------------|--|
| Triethanolamine | Fish LC50 Pimephales promelas: 11,800 mg/L (96 hr)                             |
|                 | Aquatic Invertebrates EC50 Ceriodaphnia dubia: 609.88 mg/L (48 hr [mortality]) |
|                 | Aquatic Plants EC50 Desmodesmus subspicatus: 216 mg/L (72 hr [growth rate])    |
| Fenbendazole    | Aquatic Invertebrates EC50 Daphnia magna: 0.0165 mg/L (48 hr [immobilisation]) |

### Chronic (long-term) toxicity

#### Assessment:

Toxic to aquatic life with long lasting effects.

**Product data:** No data available.

#### Substance data:

| Name                 | Result   |
|----------------------|--|
| Monopropylene glycol | Aquatic Invertebrates NOEC Ceriodaphnia sp.: 13020 mg/L (7 d [reproduction]) |
| Triethanolamine      | Aquatic Invertebrates NOEC Daphnia magna: 16 mg/L (21 d [mortality])         |
| Fenbendazole         | Aquatic Invertebrates NOEC Daphnia magna: 0.00063 mg/L (21 d [growth])       |

### Persistence and degradability

**Product data:** No data available.

#### Substance data:

| Name                 | Result  |
|----------------------|---|
| Monopropylene glycol | The substance is readily biodegradable. 81.7% degradation in water, measured by CO2 evolution, after 28 days. |
| Polyacrylic acid     | The substance is readily biodegradable. 84.7% degradation, measured by O2 consumption, after 28 days.         |
| Triethanolamine      | The substance is readily biodegradable. 100% degradation in water, measured by CO2 evolution, after 5 days.   |

### Bioaccumulative potential

**Product data:** No data available.

#### Substance data:

| Name                 | Result   |
|----------------------|--|
| Monopropylene glycol | The substance is not expected to bioaccumulate (BCF: 0.09).                            |
| Polyacrylic acid     | The substance is not expected to bioaccumulate (BCF= < 3.9 L/kg).                      |
| Triethanolamine      | The substance has the potential to bioaccumulate (log Kow: 3.85, QSAR substance data). |

### Mobility in soil

**Product data:** No data available.

#### Substance data:

| Name                 | Result   |
|----------------------|--|
| Monopropylene glycol | The substance is highly mobile, therefore, adsorption to soil is not expected (calculated Koc: 2.9). |

# Safety Data Sheet

According to New Zealand, Hazardous Substances and New Organisms Act 1996 (HSNO Act) and Regulations, as amended.

Initial preparation date: 22.05.2019

Revision date: 22.07.2024

## FEN-IVERQUANTEL

| Name             | Result  |
|------------------|---|
| Polyacrylic acid | The substance is mobile to moderately mobile in soil. Koc: 6 - 137 L/kg [read-across]   |
| Triethanolamine  | The substance is slightly mobile, therefore, adsorption to soil and sediment is expected (log Koc= 3.65 dimensionless at 25 °C).              |
| Fenbendazole     | The substance is hardly mobile, therefore, there is a high potential for adsorption to soil and sediment (log Koc:4.38, QSAR substance data). |

### Hazard to the ozone layer

**Product data:** No data available.

**Substance data:** No data available.

**Other adverse effects:** No data available.

## SECTION 13: Disposal considerations

### Disposal methods:

It is the responsibility of the waste generator to properly characterize all waste materials according to applicable regulatory agencies. Dispose of in accordance with all applicable local, regional, state and federal regulations.

### Contaminated packages:

Not determined or not applicable.

### Disposal methods that should not be used:

No additional information.

## SECTION 14: Transportation information

### Road/Rail transport: (NZS 5433:1999)

|                               |   |
|-------------------------------|---|
| UN number                     | 3082  |
| UN proper shipping name       | ENVIRONMENTALLY HAZARDOUS SUBSTANCE, LIQUID, N.O.S. (Fenbendazole)                      |
| UN transport hazard class(es) | 9  |
| Packing group                 | III   |
| Environmental hazards         | Marine Pollutant<br>Fenbendazole  |
| Special precautions for user  | None  |

### International Air Transport Association Dangerous Goods Regulations (IATA-ICAO)

|                               |   |
|-------------------------------|---|
| UN number                     | 3082  |
| UN proper shipping name       | ENVIRONMENTALLY HAZARDOUS SUBSTANCE, LIQUID, N.O.S. (Fenbendazole)                      |
| UN transport hazard class(es) | 9  |

Transport in bulk according to Annex II of MARPOL and the IBC Code: Not Applicable

## SECTION 15: Regulatory information

**New Zealand Inventory of Chemicals (NZIoC):** All of the ingredients are listed or exempt.

### HSNO Classification or Subclasses:

| Class                 | GHS Category | HSNO Category |
|-----------------------|--------------|---------------|
| Acute toxicity (oral) | Category 4   | 6.1D (oral)   |
| Eye irritation        | Category 2A  | 6.4A          |
| Reproductive toxicity | Category 2   | 6.8B          |

|   |                              |
|---|------------------------------|
| <b>HSNO Group Standard Name:</b>  | <b>HSNO Approval Number:</b> |
| Veterinary Medicines (Non-dispersive Closed System Application) Group Standard 2020 | HSR100758                    |

**HSNO Controls:** Not determined.

**Approved handler test certificate:** Not determined.

**Tracking:** Not determined.

**Controlled substance license requirements:** Not applicable.

### Agricultural Compounds and Veterinary Medicines Act 1997:

|             |       |
|-------------|-------|
| ACVM number | A9834 |
|-------------|-------|

**Montreal Protocol (Ozone Depleting Substances):** None of the ingredients are listed.

**Stockholm Convention (Persistent Organic Pollutants):** None of the ingredients are listed.

**Rotterdam Convention (Prior Informed Consent):** None of the ingredients are listed.

**Basel Convention (Hazardous Waste):** None of the ingredients are listed.
